Table with columns: BRITISH and FOREIGN. Lists towns like London, New York, Paris, Tokyo, Chicago, etc. with population figures.

BILLS OF EXCHANGE.

These differ from Promissory Notes in several important particulars. A Bill of Exchange is an order by a person (the drawer) upon another person (the drawee) to pay a sum of money at a certain time. To be of value it must be accepted by the drawee. Liability for payment rests first with the drawee, or, failing him, the drawer. It must be stamped according to the amount concerned. "Days of grace" are the same as for Promissory Notes.

Sample Bill of Exchange form with fields for amount (£100), date (21st 1906), parties (Robert Smith, John Jones & Co), and terms (Sixty days after date).

Note.—Should a Promissory Note or Bill of Exchange fall due on a Bank Holiday, it is payable the day after; or on Sunday, Good Friday or Christmas Day, then the day previous.

RE-DIRECTION OF PARCELS.

Parcels are, when re-directed, liable to additional postage at the prepaid rate for each re-direction, except where the original and the second address are both within the delivery of the same Post Office, and the re-direction is made within the period of free re-direction allowed for other classes of correspondence. A parcel will not, however, be delivered free of charge to a person who has previously refused to accept it, and for re-direction from a Returned Letter Office a second postage is invariably charged.

PARCELS (FOREIGN AND COLONIAL).

Parcels are accepted for parcel post to most foreign countries under conditions similar to the inland regulations except that for customs requirements the contents must be declared. The customs charges can be prepaid or collected on delivery. The postage varies to different countries and must be prepaid. Insurance fee is 5d. for first £12, 2d. for each additional £12.

MONEY ORDERS (INLAND).

The postal authorities cannot issue a single money order for more than £40, and will only cash them at the money order office at which they are made payable, unless they are crossed, when they can be paid through a bank. No fractional part of a 1d. can be contained in a money order.

Each order is numbered, as is also the counterfoil attached, which latter should be retained and name of payee filled in. The Postmaster-General will entertain no further claim after an order is once paid. Stamps to the amount of 5d., but not more than three in number can be affixed to make up odd sums.

POST OFFICE SAVINGS BANK.

Established at all money order offices. No person can have more than one account. Amounts placed in the bank on behalf of children under seven years of age cannot be withdrawn until the child reaches that age, and then only under his or her own signature. The smallest amount received at a time is 1/-, and this may take the form of 12 penny stamps affixed to a special form. Each depositor receives a bank book in which the amount of each deposit should be entered at the time of paying in. If the deposit is £20 or over, a special acknowledgment is sent from the head London office. Interest is allowed at the rate of $2\frac{1}{2}$ per cent. Any amount not exceeding £1 may be withdrawn without previous notice, on presenting the bank book. The bank book should be sent each year, postage free, on the anniversary of the date when the account was opened, to the Controller of the Savings Bank Department for purposes of checking and adding interest. The withdrawal of money can be expedited by telegraphing, the depositor paying cost of telegrams.

COMMUNICATION BY WIRELESS TELEGRAPHY WITH SHIPS AT SEA.

Private radio-telegrams for transmission to or from ships of most nationalities, including British, through coast stations in the United Kingdom, are usually charged 11d. per word. There is a special long-distance service with certain ocean liners through the Devises Government station at a total charge of 11d. a word. There is also a service through the Poldhu (Marconi) station, at a total charge of about 2s. 10d. per word.

INSURED BOX POST.

An Insured Box Post intended for the conveyance of articles of gold and silver, precious stones, jewellery, and other articles of a similar nature, which are prohibited from transmission in insured letters may now be sent in the letter mails to certain countries as "Insured Boxes." Certain articles are prohibited, such as current coin, letters or correspondence, bank notes, securities, etc. An insured box must not exceed 2-lb. in weight, and must not measure more than 12 inches in length, 4 inches in breadth, and 4 inches in depth. The boxes must be strongly made of metal or wood. The postage is 2d. for 2-oz., with minimum of 6d. irrespective of destination. The maximum limit of insurance is £400. There are special directions as to how the boxes shall be packed and labelled.

TELEGRAPHS.

The Postmaster-General's telegraphs are open to the public for communication to all parts of the United Kingdom, to places abroad, and to ships at sea.

The charge for an "Inland" telegram is independent of distance, and depends upon the number of words only.

Foreign and Colonial telegraph systems are largely regulated by an International Convention, to which nearly all countries are parties.

Telegraph offices are usually open on week-days from 9 a.m. to 7 p.m., but in London and a few of the largest provincial towns, offices are always open, day and night, and in many towns telegrams may be despatched at any hour from the railway station.

INLAND TELEGRAMS.

The charge is 1/- for the first twelve words including the address, and 1d. for every additional word.

Telegrams can be repeated on payment of half the original charge, which extra payment is refunded if error is detected. Telegrams may be posted in wall or pillar boxes, or handed to rural postmen, and are wired as soon as received at the nearest telegraph office. Late fees secure attention, in certain cases, to telegrams handed in after the usual hours. The cost of registering an abbreviated address, which must consist of two words, is £2.

Telegrams in plain language in any modern European tongue are charged for according to the number of words; but all words not forming part of any modern European language, and all unintelligible combinations of letters are charged for at the rate of five letters to a word.

Exceptions—Words which are ordinarily written as one, or coupled by hyphens, as "mother-in-law," "forty-seven," "warehouseman" are counted as one word.

Such names as O'Neil, MacDonald, De la Rue, and names with the prefix "St." as St. Pancras, are charged for as single words, but double names like Bouverie-Tracy, although written with a hyphen, count as two words.

Such abbreviations as "can't," "won't," "couldn't," are counted as single words.

Figures are counted at the rate of five figures to a word. For example: "38563" counts as one word, while "385634" counts as two words.

Names such as "Newcastle-on-Tyne," "Abbey-Holme" and "Bodmin Road" are counted as one word, but "Hanging Ditch" and "Drury Lane" are each counted as two words.

When it is necessary to add the name of a county to the name of a place to distinguish it from another place of the same name, e.g., Egremont (Ches.), the name of the county is not charged for.

When words are underlined, or placed in a parenthesis, or within inverted commas, one extra word is charged for.

One word each is also charged for the ordinary signs of punctuation if they are required to be transmitted.

When the address is beyond the limit of free delivery, portage is charged at the rate of 6d. per mile or part of a mile, the distance being calculated from the limit of free delivery.

TELEGRAPH POSTAL SERVICE.

A telegram can now be forwarded partly by telegraph and partly by post. For example:—"Poste Smith, 10 Broad Street, Calcutta, Brindisi." This could be telegraphed to Brindisi to catch the outgoing mail, and then forwarded on by post to its destination. For charges, enquire at any Telegraph Office.

TELEGRAMS (FOREIGN AND COLONIAL).

Must be written on special forms and are accepted in the language of any of the principal European countries. The rates vary; see top of next column.

Table of Charges for Colonial and Foreign Telegrams from any Post Office in the United Kingdom.

In no case is a lower sum than 10d. accepted for a telegram or reply.

MOTOR INDEX MARKS.

Table listing motor index marks for various counties and regions, such as London, West Bromwich, and Kent.

RATE OF INTEREST PER ANNUM.

Unlimited calculations may be made from this Table. For instance, to find the interest of £1,320, at 3 1/2% per annum, add the sums given for £1,000, £300, and £20...

Table showing interest rates for different principal amounts and percentages (2 1/2, 3, 3 1/2, 4, 5 per cent).

THE READY RECKONER.

EXAMPLE—44 at 1 1/2 d. equals 44 at 1 d. 2 0 4, 44 at 3/4 d. 0 2 9, £ s. d. £2 3 1

Large table for calculations with columns for No., 1/2 d., 3/4 d., 1 d., 2 d., 3 d., 4 d., 5 d., 6 d., 7 d., 8 d., 9 d., 10 d., 11 d., No.

For numbers over 50 and under 100 and for sums not mentioned, make use of two columns, thus:—

Small table showing calculations for 56 at 8d., 50 at 8d., 6 at 8d., 50 at 6d., and 50 at 3/4 d.

BANK OF ENGLAND NOTES.

The tender of Bank of England Notes is legal in England and Wales for every purpose and by anyone (except by the Bank of England). These are issued for £5, £10, £20, £50, £100, £200, £500, and £1,000. No person is compelled to give change for a bank note.

SILVER.

STANDARD SILVER formerly contained thirty-seven fortieths of fine silver and three fortieths of alloy: millisimal fineness, 925. But by an amending Act (Coinage Act, 1920) silver for coinage now contains half silver, half alloy; millisimal fineness, 500. The change in fineness became necessary when silver appreciated from a pre-war value of less than 30d. an ounce to as high as 88d. in the early part of 1920. Since the passing of the Act the value of silver has fallen but it is still high and unstable, and the melting of silver coin, as well as its export, is prohibited. Silver is a legal tender for sums not exceeding two pounds.

BRONZE.

Bronze is an alloy of copper 95 parts, tin 4 parts, zinc 1 part. Bronze is not a legal tender for sums exceeding one shilling. The half-penny is exactly one inch in diameter. The penny is exactly one and one-fifth inch in diameter. Three pennies, or five half-pennies, or ten farthings weigh one ounce avoirdupois.

At some of their larger branches, indeed, special surgical departments have been established, at which a feature of great usefulness is the constant attendance of a trained nurse, who will be happy to call at the homes of patients to take measurements for trusses, belts, &c., or to explain the handling of appliances whenever this is thought desirable by the patient's medical man. All requirements of a special nature, moreover, which are entrusted to Boots *The* Chemists are carried out with the utmost precision and promptitude.

BUSINESS PROGRESS

—AND—

BUSINESS PROSPECTS

THE development of BOOTS PURE DRUG CO. LTD., and its associated companies, is a matter well known, not only in commercial circles, but also among the general public. The business originated as a private concern with Sir Jesse Boot as the Managing Director, and in the year 1883 was incorporated as a private limited company. Marvellous extensions of trade subsequently made the issue of shares to the public desirable, and by successive arrangements the constantly increasing activities of the organization have called into existence other companies. The parent company, Boots Pure Drug Co. Ltd., is principally engaged in the manufacture and importation of drugs, fine chemicals, and other articles, while the retail business is carried out chiefly by five well known associated companies—Boots Cash Chemists (Eastern) Ltd., Boots Cash Chemists (Western) Ltd., Boots Cash Chemists (Lancashire) Ltd., Boots Cash Chemists (Southern) Ltd., and Boots Cash Chemists (Northern) Ltd.

From their foundation these companies have been highly popular with investors. Their business meets a real public need, and it has been carried on year by year so as to provide a perfect public service on the one hand, and on the other, to preserve an even keel in financial matters, and so make the companies' shares stable for investment purposes rather than a medium for speculation. Such a steady success has attended these sound scientific principles that the business which started with one shop has now over 600 retail branches as well as huge laboratories, factories and warehouses, and its shareholders aggregate in number over 40,000.

The soundness and enterprise of the companies was well proved in pre-war days, and confirmed during the war period; and these qualities are now being employed carefully but energetically, and with conspicuous success, in the ever widening field which the present phase of reconstruction and development offers.

character of alien manufacture. Everything that health and comfort demands—everything a dainty woman needs for the preservation and care of the hair, the teeth, the skin and complexion, can be purchased from Boots *The Chemists* with manifest advantage in price—in quality.

Boots the Chemists are probably the largest retailers of toilet products in the world. They have over 600 branches throughout the country.
