"Days of grace" are the same as for Promissory Notes.

Parcels are, when re-directed, liable to additional postage at the prepaid rate for each re-direction, except where the original and the second address are both within the delivery of the same Post Office, and the re-direction is made within the period of free re-direction allowed for letters. A parcel will not, however, be delivered free of charge to a person who has previously refused to accept it, and for re-direction from a Returned Letter Office a second postage is invariably charged.

PARCELS (FOREIGN AND COLONIAL).

Parcels are accepted for parcel post to most foreign countries under conditions similar to the inland regulations except that for customs requirements the contents must be declared. The customs charges can be prepaid or collected on delivery. The postage varies to different countries and must be prepaid. Insurance fee is 5d. for first £12, 2d. for each additional £12.

MONEY ORDERS (INLAND).

The postal authorities cannot issue a single money order for more than £40, and will only cash them at the money order office at which they are made payable, unless they are crossed, when they can be paid through a bank. No fractional part of a 1d. can be contained in a money order.

Before parting with a postal order, always fill in the name of the person to whom the amount is to be paid. Each order is numbered, as is also the counterfoil attached, which latter should be retained and name of payee filled in. The Postmaster-General will entertain no further claim after an order is once paid. Stamps to the amount of 5d., but not more than three in number can be affixed to make up odd sums.

POST OFFICE SAVINGS BANK.

Established at all money order offices. No person can have more than one account. Amounts placed in the bank on behalf of children under seven years of age cannot be withdrawn until the child reaches that age, and then only under his or her own signature. The smallest amount received at a time is 1/-, and this may take the form of 12 penny stamps affixed to a special form. Each depositor receives a bank book in which the amount of each deposit should be entered at the time of paying in. If the deposit is £20 or over, a special acknowledgment is sent from the head London office. Interest is allowed at the rate of $2\frac{1}{2}$ per cent. Any amount not exceeding £1 may be withdrawn without previous notice, on presenting the bank book. The bank book should be sent each year, postage free, on the anniversary of the date when the account was opened, to the Controller of the Savings Bank Department for purposes of checking and adding interest. The withdrawal of money can be expedited by telegraphing, the depositor paying cost of telegrams.

BUSINESS PROGRESS

—AND—

BUSINESS PROSPECTS

THE development of BOOTS PURE DRUG CO. LTD., and its associated companies is a matter well known, not only in commercial circles, but also among the general public. The business originated as a private concern with Sir Jesse Boot as the Managing Director, and in the year 1883 was incorporated as a private limited company. Marvellous extensions of trade subsequently made the issue of shares to the public desirable, and by successive arrangements the constantly increasing activities of the organization have called into existence other companies. The parent company, Boots Pure Drug Co. Ltd., is principally engaged in the manufacture and importation of drugs, fine chemicals, and other articles, while the retail business is carried out chiefly by five well known associated companies—Boots Cash Chemists (Eastern) Ltd., Boots Cash Chemists (Western) Ltd., Boots Cash Chemists (Lancashire) Ltd., Boots Cash Chemists (Southern) Ltd., and Boots Cash Chemists (Northern) Ltd.

From their foundation these companies have been highly popular with investors. Their business meets a real public need, and it has been carried on year by year so as to provide a perfect public service on the one hand, and on the other, to preserve an even keel in financial matters, and so make the companies' shares stable for investment purposes rather than a medium for speculation. Such a steady success has attended these sound scientific principles that the business which started with one shop has now over 640 retail branches as well as huge laboratories, factories and warehouses, and its shareholders aggregate in number over 40,000.

The soundness and enterprise of the companies was well proved in pre-war days, and confirmed during the war period; and these qualities are now being employed carefully but energetically, and with conspicuous success, in the ever widening field which the present phase of business offers.
