**INVESTMENTS AND INTEREST.**

To find the price at which £100 stock (bearing a definite interest) must be bought to yield a given amount of interest, multiply the price of the stock by the figures representing the interest it bears, and divide by those representing the interest desired, thus:—

Find selling price of £100 stock bearing 5% to yield 3½%.	£100 0 0	5
	3½	500 0 0
		142 17 ½

To find what interest a stock (bearing definite interest) will show if bought at a certain price, multiply the nominal price of the stock by the interest it bears and divide by the price given for it, thus:—

What interest will a £100 stock bearing interest at 3% show if bought at (a) £110 (b) £90?	£100 0 0	£100 0 0
	3	3
	110	300 0 0
		2 14 6½
		3 6 8

**TABLE OF DISCOUNTS.**

¼% equals 3d. in £1 or 3/16th of principal	2½% " 6d. " 1/4th "
3% " 9d. " 3/8th "	5% " 1/- " 1/2th "
7½% " 1/8 " 3/4th "	10% " 2/- " 1th "

The following rule will be found a very simple and quick way of calculating how much money is due for irregular rates of interest.

For instance, what is 3% on £65? First, multiply the amount (65) by double the percentage (3x2=6) 65 6 — 390

Then divide the number arrived at into two parts by drawing a line between the last two figures, thus, 39/0. The figures to the left of the line are the number of shillings, and the one on the right the number of pence, so that the answer is 39/-.

In some cases the last figure will not be a cypher, then it will be necessary to add to it one-fifth of its value, as shown in the following:

What is 3% on £66?	66
Proceed as before, viz.,	6
	— 39/6
Then add one-fifth of the pence column to the number ...	39/6
One-fifth of 6 ...	1 1/5
	39/7½

**CALCULATION OF INTEREST.**

You lend a man £93 at 5% for 21 days. What interest are you entitled to? 5% = 1/- in the £1 (12 pence in the £1); 12 pence for 12 months equals one penny per month; three weeks equals three-fourths of a month. You are entitled to 93/- (one shilling in the £1) for a full year, or 93 pence for a month; therefore, 3/4 of 93 pence will give the answer (69½).

**Note.**—At 5%, a month's interest is one penny for every pound outlaid, and any part of 5% or any part of a calendar month can easily be calculated therefrom.

Find the interest on £90 at 2½% for 7 months. 2½% equals 6d. in the £1. 3/4d. equals interest for 7 months on £1, therefore 3/4 X 90 = 315d. or 26/3.

Another way:—

To ascertain amount due on a given sum for a definite number of days at a stated interest, say £75 for 73 days at 5%, first find the amount due on the sum for 12 months by multiplying the amount by the rate of interest and dividing by 100, e.g.:—

£75 0 0	5
100	375 0 0
	3 15 0

Having found the amount due for 12 months, multiply by the number of days in question and divide by 365, e.g.:—

£3 15 0	73
365	273 15 0
	0 15 0

or from E. PONSONBY, LTD.,

**ESTIMATING PROFITS.**

It is generally agreed that mistakes are likely to arise unless profit is based on the "returns." It is quite a debatable point on some lines, such as selling of stocks and shares as to whether the percentage of profit should be calculated from cost or selling price, but for tradesmen there should be only one rule, and that is, all profit should be calculated on returns.

For instance, say goods are bought for £75 and sold for £100. Of this, £25 (or 25%) is profit, and could be banked, leaving the outlay or principal (£75) intact. But if one considered that a profit of 33½% had been made, and were £33 6s. 8d. banked, the principal would be reduced to £66 13s. 4d. When calculating the rate of profit, the principal must remain intact. In some trades it is the custom to calculate profit on the selling price, and when such a question arises it should be made very clear as to whether calculation is based "on cost," or "on returns."

The following is an easy method of calculating profits:—

½ added to the cost price will give—	50% on cost or 33½% on returns
¾ " 33½% " 25% "	
1th " 25% " 20% "	
1 1/4th " 20% " 16½% "	
1 1/2th " 16½% " 14½% "	
1 3/4th " 14½% " 12½% "	
2th " 12½% " 11½% "	
2 1/4th " 10% " 9½% "	

The above remarks apply more directly to the retailing of goods than to property, shares, etc.

Each depositor receives a bank book in which the amount of each deposit should be entered at the time of paying in. If the deposit is £20 or over, a special acknowledgment is sent from the head London office. Interest is allowed at the rate of 2 $\frac{1}{2}$  per cent. Any amount not exceeding £1 may be withdrawn without previous notice, on presenting the bank book. The bank book should be sent each year, postage free, on the anniversary of the date when the account was opened, to the Controller of the Savings Bank Department for purposes of checking and adding interest. The withdrawal of money can be expedited by telegraphing, the depositor paying cost of telegrams.

## COMMUNICATION BY WIRELESS TELEGRAPHY WITH SHIPS AT SEA.

Private radio-telegrams for transmission to or from ships of most nationalities, including British, through coast stations in the United Kingdom, are usually charged 11d. per word. There are special long-distance services with certain ocean liners through the Devizes Government station (range 1500 m.) at a total charge of 11d. per word, and through the Government high power station at Oxford (range 2500 m.), inclusive charge 1s. 6d. a word, and through the Marconi Station at Clifden (range 2000 m.) inclusive charge about 1s. 6d. a word.

**INSURED BOX POST.**

An Insured Box Post intended for the conveyance of articles of gold and silver, precious stones, jewellery, and other articles of a similar nature, which are prohibited from transmission in insured letters may now be sent in the letter mails to certain countries as "Insured Boxes." Certain articles are prohibited, such as current coin, letters or correspondence, bank notes, securities, etc. An insured box must not exceed 2-lb. in weight, and must not measure more than 12 inches in length, 4 inches in breadth, and 4 inches in depth. The boxes must be strongly made of metal or wood. The postage is 2d. for 2-oz., with minimum of 6d. irrespective of destination. The maximum limit of insurance is £400. There are special directions as to how the boxes shall be packed and labelled.

**CASH ON DELIVERY.**

Arrangements have been made whereby senders of postal packets between the United Kingdom and certain British possessions and other places abroad can have the value collected on delivery, and same remitted by postal or money order.

**FOREIGN AND COLONIAL CORRESPONDENCE.**

To British possessions generally, Egypt, United States of America, Tangier, H.M. Ships in Foreign waters and H.M. Forces in Germany and Constantinople, 1½d. per oz.

To all other places 3d. for the first oz., and 1½d. for each succeeding oz. or fraction.

<b>PRINTED PAPERS (FOREIGN).</b> ½d. for every 2-oz.	<b>POSTCARDS (FOREIGN).</b> Rate... .. 1½d.
<b>REGISTRATION (FOREIGN).</b> Fee ... .. 3d.	<b>BLIND LITERATURE.</b> ½d. per lb. (Max. 6½-lb.)

**TELEGRAPHS.**

The Postmaster-General's telegraphs are open to the public for communication to all parts of the United Kingdom, to places abroad, and to ships at sea.

The charge for an "Inland" telegram is independent of distance, and depends upon the number of words only.

Foreign and Colonial telegraph systems are largely regulated by an International Convention, to which nearly all countries are parties.

Telegraph offices are usually open on week-days from 9 a.m. to 7 p.m., but in London and a few of the largest provincial towns, offices are always open, day and night, and in many towns telegrams may be despatched at any hour from the railway station.

**INLAND TELEGRAMS.**

The charge is 1/- for the first twelve words including the address, and 1d. for every additional word.

Telegrams can be repeated on payment of half the original charge, which extra payment is refunded if error is detected. Telegrams may be posted in wall or pillar boxes, or handed to rural postmen, and are wired as soon as received at the nearest telegraph office. Late fees secure attention, in certain cases, to telegrams handed in after the usual hours. The cost of registering an abbreviated address, which must consist of two words, is £2.

Telegrams in plain language in any modern European tongue are charged for according to the number of words; but all words not forming part of any modern European language, and all unintelligible combinations of letters are charged for at the rate of five letters to a word.

Exceptions—Words which are ordinarily written as one, or coupled by hyphens, as "mother-in-law," "forty-seven," "warehouseman" are counted as one word.

Such names as O'Neil, MacDonald, De la Rue, and names with the prefix "St." as St. Pancras, are charged for as single words, but double names like Bouverie-Tracy, although written with a hyphen, count as two words.

Such abbreviations as "can't," "won't," "couldn't," are counted as single words.

Figures are counted at the rate of five figures to a word. For example: "38563" counts as one word, while "385634" counts as two words.

Names such as "Newcastle-on-Tyne," "Abbey-Holme" and "Bodmin Road" are counted as one word, but "Hanging Ditch" and "Drury Lane" are each counted as two words.

When it is necessary to add the name of a county to the name of a place to distinguish it from another place of the same name, e.g., Egremont (Ches.), the name of the county is not charged for.

When words are underlined, or placed in parentheses, or within inverted commas, one extra word is charged for.

One word each is also charged for the ordinary signs of punctuation if they are required to be transmitted.

When the address is beyond the limit of free delivery, portage is charged at the rate of 6d. per mile or part of a mile, the distance being calculated from the limit of free delivery.

**MIXED POSTAL AND TELEGRAPH SERVICE.**

A telegram can now be forwarded partly by telegraph and partly by post. For example:—"Poste Smith, 10 Broad Street, Calcutta, Marseilles." This could be telegraphed to Marseilles to catch the outgoing mail, and then forwarded on by post to its destination. For charges, enquire at any Telegraph Office.

Telegrams may also be sent to certain ports in the United Kingdom (such as Dover, Liverpool, etc.) for onward transmission as letters in the outgoing mails.

**Table of Charges for Colonial and Foreign Telegrams from any Post Office in the United Kingdom.**

*In no case is a lower sum than 10d. accepted for a telegram or reply.*

# SICK-ROOM AND SURGICAL EQUIPMENT

**B**OOTS *The* Chemists provide facilities of very special value, and on a scale not previously attempted. Hitherto it has been usual to procure all except simple surgical appliances from the makers as necessity arose. It will easily be understood that under this system valuable time was often lost in cases of urgency; and the worth of the comprehensive stock now maintained by Boots *The* Chemists at their various branches will be readily appreciated. Surgical and First Aid requisites are thoroughly tested to ensure a high standard of efficiency and

reliability, and all requirements of a special nature entrusted to Boots *The* Chemists are carried out with precision and promptitude. At some of their larger branches, indeed, special surgical departments have been established, at which a feature of great usefulness is the constant attendance of a trained nurse, who will be happy to call at the homes of patients to take measurements for trusses, belts, &c., or to explain the handling of appliances whenever this is thought desirable by the patient's medical man. You are safe in dealing with Boots!

# BUSINESS PROGRESS

—AND—

# BUSINESS PROSPECTS

THE development of BOOTS PURE DRUG CO. LTD., and its associated companies is a matter well known, not only in commercial circles, but also among the general public. The business originated as a private concern with Sir Jesse Boot as the Managing Director, and in the year 1883 was incorporated as a private limited company. Marvellous extensions of trade subsequently made the issue of shares to the public desirable, and by successive arrangements the constantly increasing activities of the organization have called into existence other companies. The parent company, Boots Pure Drug Co. Ltd., is principally engaged in the manufacture and importation of drugs, fine chemicals, and other articles, while the retail business is carried out chiefly by five well known associated companies—Boots Cash Chemists (Eastern) Ltd., Boots Cash Chemists (Western) Ltd., Boots Cash Chemists (Lancashire) Ltd., Boots Cash Chemists (Southern) Ltd., and Boots Cash Chemists (Northern) Ltd.

From their foundation these companies have been highly popular with investors. Their business meets a real public need, and it has been carried on year by year so as to provide a perfect public service on the one hand, and on the other, to preserve an even keel in financial matters, and so make the companies' shares stable for investment purposes rather than a medium for speculation. Such a steady success has attended these sound scientific principles that the business which started with one shop has now over 640 retail branches as well as huge laboratories, factories and warehouses, and its shareholders aggregate in number over 40,000.

The soundness and enterprise of the companies was well proved in pre-war days, and confirmed during the war period; and these qualities are now being employed carefully but energetically, and with conspicuous success, in the ever widening field which the present phase of business offers.
