**INVESTMENTS AND INTEREST.**

To find the price at which £100 stock (bearing a definite interest) must be bought to yield a given amount of interest, multiply the price of the stock by the figures representing the interest it bears, and divide by those representing the interest desired, thus:—  
 Find selling price of £100 stock bearing 5% to yield 3 1/2%.

To find what interest a stock (bearing definite interest) will show if bought at a certain price, multiply the nominal price of the stock by the interest it bears and divide by the price given for it, thus:—

What interest will a £100 stock bearing interest at 3% show if bought at (a) £110 (b) £90?

**TABLE OF DISCOUNTS.**

|  |
|--|
| 12% equals 3d. in £1 or 1/4th of principal |
| 2 1/2% " 6d. " 1/20th "                    |
| 3% " 9d. " 1/11th "                        |
| 3 1/2% " 1s. " 1/8th "                     |
| 5% " 1/- " 1/20th "                        |
| 7 1/2% " 1/6 " 1/8th "                     |
| 10% " 2/- " 1/10th "                       |

The following rule will be found a very simple and quick way of calculating how much money is due for irregular rates of interest.

For instance, what is 3% on £65?

First, multiply the amount (65) by double the percentage (3x2=6)

|       |
|-------|
| 65    |
| 6     |
| — 390 |

Then divide the number arrived at into two parts by drawing a line between the last two figures, thus, 39/0. The figures to the left of the line are the number of shillings, and the one on the right the number of pence, so that the answer is 39/-.

In some cases the last figure will not be a cypher, then it will be necessary to add to it one-fifth of its value, as shown in the following:

What is 3% on £66?

Proceed as before, viz.,

|   |
|---|
| 66  |
| 6   |
| — 396   |
| Then add one-fifth of the pence column to the number ... 39/6 |
| One-fifth of 6 ... 1 1/5                                      |
| 39/7 1/5  |

**CALCULATION OF INTEREST.**

You lend a man £93 at 5% for 21 days. What interest are you entitled to?

5% = 1/- in the £1 (12 pence in the £1); 12 pence for 12 months equals one penny per month; three weeks equals three-fourths of a month. You are entitled to 93/- (one shilling in the £1) for a full year, or 93 pence for a month; therefore, 3/4 of 93 pence will give the answer (69 3/4).

Note.—At 5%, a month's interest is one penny for every pound outlaid, and any part of 5% or any part of a calendar month can easily be calculated therefrom.

or Find the interest on £90 at 2 1/2% for 7 months. 2 1/2% equals 6d. in the £1. 3 1/2d. equals interest for 7 months on £1, therefore 3 1/2 x 90 = 315d. or 26/3.

Another way:—

To ascertain amount due on a given sum for a definite number of days at a stated interest, say £75 for 73 days at 5%, first find the amount due on the sum for 12 months by multiplying the amount by the rate of interest and dividing by 100, e.g.:

|               |
|---------------|
| £75 0 0       |
| 5             |
| 100 ) 375 0 0 |
| 3 15 0        |

Having found the amount due for 12 months, multiply by the number of days in question and divide by 365, e.g.:

|                |
|----------------|
| £3 15 0        |
| 73             |
| 365 ) 273 15 0 |
| 0 15 0         |

**ESTIMATING PROFITS.**

It is generally agreed that mistakes are likely to arise unless profit is based on the "returns." It is quite a debatable point on some lines, such as selling of stocks and shares as to whether the percentage of profit should be calculated from cost or selling price, but for tradesmen there should be only one rule, and that is, all profit should be calculated on returns.

For instance, say goods are bought for £75 and sold for £100. Of this, £25 (or 25%) is profit, and could be banked, leaving the outlay or principal (£75) intact. But if one considered that a profit of 33 1/3% had been made, and were £33 6s. 8d. banked, the principal would be reduced to £66 13s. 4d. When calculating the rate of profit, the principal must remain intact. In some trades it is the custom to calculate profit on the cost price. In many other trades it is the custom to calculate profit on the selling price, and when such a question arises it should be made very clear as to whether calculation is based "on cost," or "on returns."

The following is an easy method of calculating profits:—

1/2 added to the cost price will give—

50% on cost or 33 1/3% on returns

1/3rd " 33 1/3% " 25% "

1/4th " 25% " 20% "

1/5th " 20% " 16 2/3% "

1/6th " 16 2/3% " 14 2/3% "

1/7th " 14 2/3% " 12 1/2% "

1/8th " 12 1/2% " 11 1/4% "

1/10th " 10% " 9 1/2% "

The above remarks apply more directly to the retailing of goods than to property, shares, &c.

The Postmaster-General will entertain no further claim after an order is once paid. Stamps to the amount of 5d., but not more than three in number can be affixed to make up odd sums.

## POST OFFICE SAVINGS BANK.

In every town and in almost every village small savings may be paid in at the Post Office. No person can have more than one account. Amounts placed in the bank on behalf of children under seven years of age cannot be withdrawn until the child reaches that age, and then only under his or her own signature. Each depositor receives a bank book in which the amount of each deposit should be entered at the time of paying in. Any sum from a shilling upwards may be deposited. If the deposit is £20 or over, a special acknowledgment is sent from the head London office. Interest is allowed at the rate of  $2\frac{1}{2}$  per cent. Any amount not exceeding £1 may be withdrawn without previous notice, on presenting the bank book. The bank book should be sent each year, postage free, on the anniversary of the date when the account was opened, to the Controller of the Savings Bank Department for purposes of checking and adding interest. The withdrawal of money up to £10 can be expedited by telegraphing, the depositor paying cost of telegrams and a service charge of one shilling.

## COMMUNICATION BY WIRELESS TELEGRAPHY WITH SHIPS AT SEA.

Private radio-telegrams for transmission to or from ships of most nationalities, including British, through coast stations in the United Kingdom, are usually charged 11d. per word. There are special long-distance services with certain ocean liners through the Devezes Government station (range 1500 m.) at a total charge of 11d. per word, and through the Government high power station at Oxford (range 3000 m. or more), inclusive charge 1s. 6d. a word.

INSURED BOX POST.

Articles of gold and silver, precious stones, jewellery, and other articles of a similar nature, which are prohibited from transmission in insured letters may now be sent in the letter mails to certain countries as "Insured Boxes." Certain articles are prohibited, such as current coin, letters or correspondence, bank notes, securities, etc. An insured box must not exceed 2-lb. in weight, and must not measure more than 12 inches in length, 4 inches in breadth, and 4 inches in depth. The boxes must be strongly made of metal or wood. The postage is 2d. for 2-oz., with minimum of 6d. The maximum limit of insurance is £400. There are special directions for packing and labelling. Customs declarations must be filled in.

CASH ON DELIVERY.

Arrangements have been made whereby senders of postal packets between the United Kingdom and certain British possessions and other places abroad can have the value collected on delivery, and same remitted by postal or money order. The "Trade Charge" *i.e.*, the amount to be collected must not exceed £40.

FOREIGN AND COLONIAL CORRESPONDENCE.

TELEGRAPHS.

The Postmaster-General's telegraphs are open to the public for communication to all parts of the United Kingdom, to places abroad, and to ships at sea.

The charge for an "Inland" telegram is independent of distance, and depends upon the number of words only.

Foreign and Colonial telegraph systems are largely regulated by International Conventions, to which nearly all countries are parties.

Telegraph offices are usually open on week-days from 8 a.m. or 9 a.m. to 7 p.m., but in London and a few of the largest provincial towns, offices are always open, day and night, and in many towns telegrams may be despatched at any hour from the railway station.

INLAND TELEGRAMS.

The charge is 1/- for the first twelve words including the address, and 1d. for every additional word. Telegrams handed in on Sundays, Good Friday, and Christmas Day charged 6d. extra. In Scotland 6d. extra on Sundays only.

Telegrams can be repeated on payment of half the original charge, which extra payment is refunded if error is detected. Telegrams may be posted in wall or pillar boxes, or handed to rural postmen, and are wired as soon as received at the nearest telegraph office. Late fees secure attention, in certain cases, to telegrams handed in after the usual hours. The cost of registering an abbreviated address, which must consist of two words, is £2 a year.

Telegrams in plain language in any modern European tongue or in Latin are charged for according to the number of words; but all words not forming part of any modern European language, or of Latin, and all unintelligible combinations of letters are charged for at the rate of five letters to a word in the text, and as one word each when used in the address.

Exceptions—Words which are ordinarily written as one, or coupled by hyphens, as "mother-in-law," "forty-seven," "warehouseman" are counted as one word.

Such names as O'Neil, MacDonald, De la Rue, and names with the prefix "St." as St. Pancras, are charged for as single words, but double names like Bouverie-Tracy, although written with a hyphen, count as two words.

Such abbreviations as "can't," "won't," "couldn't," are counted as single words.

Figures are counted at the rate of five figures to a word. For example: "38563" counts as one word, while "385634" counts as two words.

Names such as "Newcastle-on-Tyne," "Abbey-Holme" and "Bodmin Road" are counted as one word, but "Hanging Ditch" and "Drury Lane" are each counted as two words.

When it is necessary to add the name of a county to the name of a place to distinguish it from another place of the same name, *e.g.*, Egremont (Ches.), the name of the county is not charged for.

When words are underlined, or placed in parentheses, or within inverted commas, one extra word is charged for.

One word each is also charged for the ordinary signs of punctuation if they are required to be transmitted.

When the address is beyond the limit of free delivery, portage is charged at the rate of 6d. per mile or part of a mile, the distance being calculated from the limit of free delivery.

MIXED POSTAL AND TELEGRAPH SERVICE.

A telegram can now be forwarded partly by telegraph and partly by post. For example:—"Poste Smith, 10 Broad Street, Calcutta, Marseilles." This could be telegraphed to Marseilles to catch the outgoing mail, and then forwarded on by post to its destination. For charges, enquire at any Telegraph Office.

Telegrams may also be sent to Dover, Lewes, Liverpool, Newcastle-on-Tyne and Southampton for onward transmission as letters in the outgoing mails.

BANK OF ENGLAND NOTES.

The tender of Bank of England Notes is legal in England and Wales for every purpose and by anyone (except by the Bank of England).

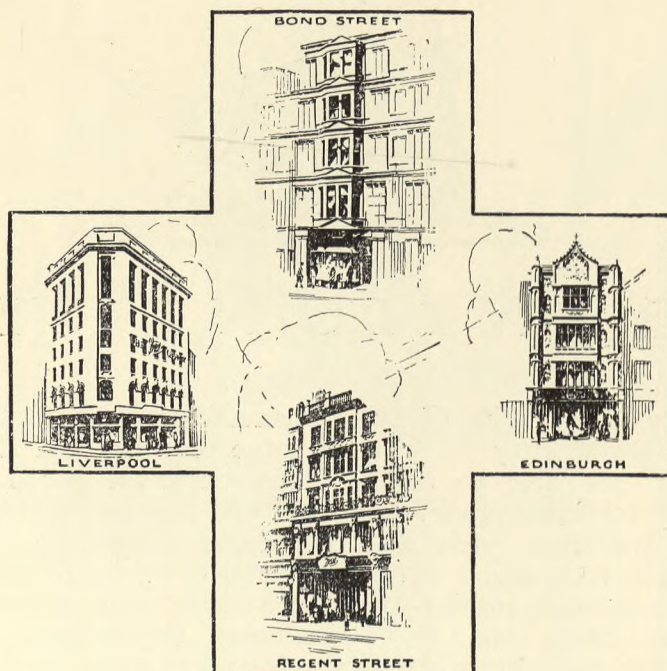

These are issued for £5, £10, £20, £50, £100, £200, £500, and £1,000. No person is compelled to give change for a bank note.

GOLD AND TREASURY NOTES.

Gold, if above the least current weight, and Treasury Notes are legal tender to any amount. Standard Gold contains twenty-two twenty-fourths (carats) of fine gold and two twenty-fourths of alloy.

STANDARD SILVER formerly contained thirty-seven fortieths of fine silver and three fortieths of alloy: millesimal fineness, 925. But by an amending Act (Coinage Act, 1920) silver for coinage now contains half silver, half alloy; millesimal fineness, 500. The change in fineness became necessary when silver appreciated from a pre-war value of less than 30d. an ounce to as high as 88d. in the early part of 1920. Since the passing of the Act the value of silver has fallen but it is still high and unstable, and the melting of silver coin, as well as its export, is prohibited. Silver is a legal tender for sums not exceeding two pounds.

# CARE

**D**ISPENSING service is a branch of the chemists' business demanding conscientious attention to detail. The weight and strength of each ingredient is of vital importance, but such attention to detail on the part of the dispenser must be backed by the knowledge that he is handling the finest drugs obtainable.

The care devoted to each department of Boots The Chemists finds no surer demonstration than

in the dispensing of doctors' prescriptions. Accuracy is observed throughout every detail by a thorough system of checking and re-checking, and all drugs and pharmaceutical preparations have to pass the most rigid tests for purity and high quality before they are taken into stock. Only through the constant observance of this care has the Dispensing Department at each branch of Boots The Chemists become so reliable a source for the compounding of doctors' prescriptions.

## *The Message of your Dressing Table*

THE dressing table reflects your personality just as surely as it indicates your sex, because it is arrayed with such intimate things. When you purchase toilet accessories it is wise to pay particular attention to construction and design. For with dressing table appointments, as with everything else of daily use, the casual whim of the moment may well become a matter for regret later.

The delicacy of feminine accessories—the vigorous beauty of essentially masculine things—each finds full expression at Boots, where can be obtained with ease and economy every hygienic requisite for the preservation and care of the hair, the teeth, the skin and the complexion.

## MODERNISING THE CHEMIST.

**M**ANY old time landmarks have disappeared; landmarks which for some reason or other the public does not seem to miss. Among these relics of past decades are the large carboys filled with mysterious coloured liquids that occupied a prominent place in the shop windows of every chemist. To see these coloured carboys was to know at once that the shop was used for the compounding of drugs and chemists' prescriptions. Inside the shop were many old volumes in which the apothecary wrote down the magic scripts that, converted into more or less nauseous fluids in neatly labelled bottles, meant life and health to those who drank the concoctions. With the natural development of modern industrial business, the chemist's shop of to-day is not

so mysterious as in days gone by. People no longer depend upon the "magic" of the druggist. PURITY and SECURITY are the factors that govern their patronage. Secrecy is shunned—open dealing is the only policy that begets confidence. The chemist, as represented by Boots The Chemists, no longer does his business in secret. Instead, you are invited to enter a spacious well-arranged shop where you can view at leisure the various preparations and merchandise offered for sale, and obtain useful knowledge respecting health and hygiene. The business of Boots The Chemists was founded in order to safeguard the interests of the public by ensuring PURITY and SECURITY in the merchandising of medicinal and pharmaceutical preparations affecting the health of the nation.

Quality also has ever been a dominant feature of Boots business. It is the foundation stone upon which the whole business has been built. To-day Boots enjoy a well-merited reputation for excellence and value—a reputation which has made possible so rapid and continued a development. The firm has now nearly 800 retail branches throughout Gt. Britain. Well-defined plans are consistently followed for the continued expansion of the business, so that Boots service shall be available in every town in England, Scotland and Wales. The branches, together with the large manufacturing laboratories and warehouses necessary to the maintenance of Boots The Chemists service to the public, employ over 13,000 people, more than 1,000 of whom are fully qualified chemists.

Rigid analytical control is an integral feature of Boots business and is in itself a guarantee of excellence and value to the public. Crude drugs are tested before purchase and on delivery. Every stage of manufacture is controlled by analysis. This testing and

research work are essentially vital to the maintenance of the highest standard of purity and quality. Wherever possible, goods are manufactured in Boots own laboratories. By means of improved internal organisation and scientific control in manufacture, all unnecessary costs are eliminated. Prices are thus kept on a moderate basis. Boots have always aimed to provide the public with a reliable and economical service, and prices are uniform in all branches throughout Great Britain.

The public continues to shop at Boots, realising that everything is done to ensure the best at the lowest possible price. Each year records an increase in the millions of Boots customers. Patronage is always extended to every new branch, not because of its newness, but because of the service available.

Boots reputation for service, quality and value will always be maintained, and customers are assured of satisfaction and security in dealing with Boots The Chemists.
