Find selling price of £100 stock bearing 5% to yield 3 1/2%.

£100 0 0	5	
3 1/2	500 0 0	142 17 1 1/2

To find what interest a stock (bearing definite interest) will show if bought at a certain price, multiply the nominal price of the stock by the interest it bears and divide by the price given for it, thus:—

What interest will a £100 stock bearing interest at 3% show if bought at (a) £110 (b) £90?

£100 0 0	£100 0 0
3	3
110	90
2 14 6 1/2	3 6 8

TABLE OF DISCOUNTS.
 1 1/2% equals 3d. in £1 or 1/4th of principal
 2 1/4% " 6d. " 1/2th " "
 3 3/8% " 9d. " 3/4th " "
 5% " 1/- " 1/2th " "
 7 1/2% " 1/6 " 3/4th " "
 10% " 2/- " 1/2th " "

The following rule will be found a very simple and quick way of calculating how much money is due for irregular rates of interest.

For instance, what is 3% on £65?
 First, multiply the amount (65) by double the percentage (3x2=6)
 65
 6
 — 390

Then divide the number arrived at into two parts by drawing a line between the last two figures, thus, 39/0. The figures to the left of the line are the number of shillings, and the one on the right the number of pence, so that the answer is 39/-.

In some cases the last figure will not be a cypher, then it will be necessary to add to it one-fifth of its value, as shown in the following:

What is 3% on £66?
 Proceed as before, viz.,
 66
 6
 — 396
 Then add one-fifth of the pence column to the number ... 39/6
 One-fifth of 6 ... 1 1/2
 — 39/7 1/2

CALCULATION OF INTEREST.
 You lend a man £93 at 5% for 21 days
 What interest are you entitled to?
 5% = 1/- in the £1 (12 pence in the £1); 12 pence for 12 months equals one penny per month; three weeks equals three-fourths of a month. You are entitled to 93/- (one shilling in the £1) for a full year, or 93 pence for a month; therefore, 3/4 of 93 pence will give the answer (69 3/4).

Note.—At 5% a month's interest is one penny for every pound outlaid, and any part of 5% or any part of a calendar month can easily be calculated therefrom.

or Find the interest on £90 at 2 1/2% for 7 months. 2 1/2% equals 6d. in the £1. 3 1/2d. equals interest for 7 months on £1, therefore 3 1/2 X 90 = 315d, or 26/3.

Another way:—
 To ascertain amount due on a given sum for a definite number of days at a stated interest, say £75 for 73 days at 5%, first find the amount due on the sum for 12 months by multiplying the amount by the rate of interest and dividing by 100, e.g.:—

£75 0 0	5	
100	375 0 0	3 15 0
73		273 15 0
365	273 15 0	0 15 0

Having found the amount due for 12 months, multiply by the number of days in question and divide by 365, e.g.:—

ESTIMATING PROFITS.
 It is generally agreed that mistakes are likely to arise unless profit is based on the "returns." It is quite a debatable point on some lines, such as selling of stocks and shares as to whether the percentage of profit should be calculated from cost or selling price, but for tradesmen there should be only one rule, and that is, all profit should be calculated on returns.

For instance, say goods are bought for £75 and sold for £100. Of this, £25 (or 25%) is profit, and could be banked, leaving the outlay or principal (£75) intact. But if one considered that a profit of 33% had been made, and were £33 6s. 8d. banked, the principal would be reduced to £66 13s. 4d. When calculating the rate of profit, the principal must remain intact. In some trades it is the custom to calculate profit on the cost price. In many other trades it is the custom to calculate profit on the selling price, and when such a question arises it should be made very clear as to whether calculation is based "on cost," or "on returns."

The following is an easy method of calculating profits:—
 1/2 added to the cost price will give—

1/2	50% on cost or 33 1/3% on returns
3/4	33 1/3% " 25% "
4/5	25% " 20% "
5/6	20% " 16 2/3% "
2/3	16 2/3% " 12 1/2% "
1/2	12 1/2% " 9 1/2% "
1/3	9 1/2% " 7% "

The above remarks apply more directly to the retailing of goods than to property, shares, etc.

POST OFFICE SAVINGS BANK.

In every town and in almost every village small savings may be paid in at the Post Office. No person can have more than one account. Amounts placed in the bank on behalf of children under seven years of age cannot be withdrawn until the child reaches that age, and then only under his or her own signature. Each depositor receives a bank book in which the amount of each deposit should be entered at the time of paying in. Any sum from a shilling upwards may be deposited. If the deposit is £20 or over, a special acknowledgment is sent from the head London office. Interest is allowed at the rate of $2\frac{1}{2}$ per cent. Any amount not exceeding £1 may be withdrawn without previous notice, on presenting the bank book. The bank book should be sent each year, postage free, on the anniversary of the date when the account was opened, to the Controller of the Savings Bank Department for purposes of checking and adding interest. The withdrawal of money up to £10 can be expedited by telegraphing, the depositor paying cost of telegrams and a service charge of one shilling.

TELEGRAPHS.

The Postmaster-General's telegraphs are open to the public for communication to all parts of Great Britain and Ireland, to places abroad, and to ships at sea.

The charge for an "Inland" telegram is independent of distance, and depends upon the number of words only.

The Foreign and Colonial telegraph system and the Radio-telegraphic system are largely regulated by International Conventions, to which nearly all countries are parties.

Telegraph offices are usually open on week-days from 8 a.m. to 7.30 or 8 p.m., but in London and a few of the largest provincial towns, offices are always open, day and night, and in many towns telegrams may be despatched at any hour from the railway station.

INLAND TELEGRAMS.

The charge is 1/- for the first twelve words including the address, and 1d. for every additional word. Telegrams handed in on Sundays, Good Friday, and Christmas Day charged 6d. extra. In Scotland 6d. extra on Sundays only.

Telegrams can be repeated on payment of half the original charge, which extra payment is refunded if error is detected. Telegrams may be posted in wall or pillar boxes, or handed to rural postmen, and are wired as soon as received at the nearest telegraph office. Late fees secure attention, in certain cases, to telegrams handed in after the usual hours. The cost of registering an abbreviated address, which must consist of two words, is £2 a year.

Telegrams in plain language in any modern European tongue or in Latin are charged for according to the number of words; but all words not forming part of any modern European language, or of Latin, and all unintelligible combinations of letters are charged for at the rate of five letters to a word in the text, and as one word each when used in the address.

Exceptions—Words which are ordinarily written as one, or coupled by hyphens, as "mother-in-law," "forty-seven," "warehouseman" are counted as one word.

Such names as O'Neil, MacDonald, De la Rue, and names with the prefix "St." as St. Pancras, are charged for as single words, but double names like Bouverie-Tracy, although written with a hyphen, count as two words.

Such abbreviations as "can't," "won't," "couldn't," are counted as single words.

Figures are counted at the rate of five figures to a word. For example: "38563" counts as one word, while "385634" counts as two words.

Names such as "Newcastle-on-Tyne," "Abbey-Holme" and "Bodmin Road" are counted as one word, but "Hanging Ditch" and "Drury Lane" are each counted as two words.

When it is necessary to add the name of a county to the name of a place to distinguish it from another place of the same name, *e.g.*, Egremont (Ches.), the name of the county is not charged for.

When words are underlined, or placed in parentheses, or within inverted commas, one extra word is charged for.

One word each is also charged for the ordinary signs of punctuation if they are required to be transmitted.

When the address is beyond the limit of free delivery, portage is charged at the rate of 6d. per mile or part of a mile, the distance being calculated from the limit of free delivery.

MIXED POSTAL AND TELEGRAPH SERVICE.

A telegram can now be forwarded partly by telegraph and partly by post. For example:—"Poste Smith, 10 Broad Street, Calcutta, Marseilles." This could be telegraphed to Marseilles to catch the outgoing mail, and then forwarded on by post to its destination. For charges, enquire at any Telegraph Office.

Telegrams may also be sent to Dover, Lewes, Liverpool, Newcastle-on-Tyne and Southampton for onward transmission as letters in the outgoing mails.

Boots Pure Drug Co. Ltd.*

THE ROMANCE OF A GREAT ORGANISATION.

“SERVICE, EFFICIENT and COMPLETE” has been the ideal set and followed faithfully by the firm of Boots The Chemists. The necessary spirit of enterprise has been irrepressibly present in all its undertakings and activities.

Nottingham is the home and hub of this great enterprise, where the firm's laboratories, factories, warehouses and workshops, occupy some 30 acres.

The development of this great centre, with its fine and extensive blocks of buildings, can be truly described as a romance. Here, at the present time, over 4,500 employees are organised for the efficient production, packing and distribution of a multitude of products.

The work is systematically divided into sections. The Analytical Department has assigned to it an independent sphere. The chief analyst is in a very true sense the representative of the customer. His word determines the quality, and the quality is always as near perfection as scientific methods, care, human skill and modern mechanical equipment can

ensure. This department is charged with the inspection and analysis of all raw materials coming into the works, and of all manufactured articles.

The great number of analyses made is evidence of the constant striving after quality which justifies the popular slogan, “You are safe in dealing with Boots.”

Chemical Research and manufacture make up another section. Continuous, patient, and systematic application in the effort to make more perfect the processes used in the production of a whole series of Fine Chemicals and synthetic perfume bases is carried on year in, year out.

The Fine Chemical Section has been working to capacity throughout the year, and further progress has been made in the production of Saccharin and special medical products.

The preparation of Insulin from the pancreatic glands of oxen has been perfected, and INSULIN-BOOTS is now known all over the Empire. Its manufacture calls into consideration many important details. In addition to

plant and laboratory for the actual extraction and purification, other laboratories are needed for testing the product at many stages, to meet the requirements of the firm's pharmacologist and bacteriologist. (The yield of pure Insulin from 1,000 cattle weighs approximately only four ounces).

Another glandular product, "PITUITARY EXTRACT," has been developed and welcomed by the medical profession on account of its guaranteed potency.

THIOSTAB, a special preparation of sodium thiosulphate solution, in ampoules ready for use, for the treatment of Dermatitis and Metallic Intoxication, has proved an extremely useful preparation.

STABILARSAN (the firm's own patented improvement upon the German "Salvarsan") and BISMOSTAB, a special preparation of Bismuth for use in connection with Stabilarsan, are standard products in the treatment of specific diseases.

So great has been the development in this side of the firm's business that special laboratory facilities have recently been added.

Medicinal Gelatine Capsules, which provide the best means of prescribing many medicines, are made in great quantities by Boots.

The Pill Department is replete with every modern appliance, including several automatic machines, each of which is capable of turning out over 1,000 gross of pills per day. The dimensions of the department in which, in different sections, lozenges, pastilles, and boiled sweets are manufactured are astonishing—as is also the tremendous output of each section.

An important branch of the firm's activities is the manufacture of compressed tablets. Portability, convenience, accuracy of dosage, thorough disintegration, and full activity are essential in compressed drugs, and Boots pay great attention to these features. So much advance has been made on this side of the business that there is scarcely any drug to-day that cannot be reproduced in the form of a compressed tablet.

Much pioneer work has been carried out by Boots in this direction. Special equipment, adequately isolated from other machinery, is in use for the manufacture of tablets for hypodermic use and for poisonous tablets—distinguishable by touch and in general appearance. Wholesale orders are received from Government departments and from firms abroad, and these are the best testimony of the worth and scientific soundness of Boots tablets.

Visitors would be fascinated to watch the processes of soap manufacture. Important improvements in plant have been carried out in recent years, and many improvements in manufacture and technique have been introduced.

Boots Perfumery Department, with its costly and scientifically designed equipment, is one of the largest perfume plants in this country. Here is a splendidly equipped store of 150 vats and tanks, with a capacity of 15,000 gallons. This department compounds all perfumes for the firm's Soap, Toilet Preparations and Powder Departments. Hundreds of gallons of Eau de Cologne and Lavender Water are bottled weekly.

An extremely important part is played by the Firm's Transport Department, which serves all other departments in this gigantic organisation. A complete transport service expeditiously moves goods in all stages, conveying them as raw materials through the warehouses to the manufacturing departments, and finally, as the finished article, to the branches.

To-day Boots have over 800 retail establishments in Great Britain. Approximately 15,000 people (of whom more than 1,100 are qualified chemists) are employed by the Boots Companies, and last year 100,000,000 customers were catered for in their shops.

A day and night pharmaceutical service has been established by the firm in Piccadilly, London, and at New Street, Birmingham— one scale of prices operating throughout the whole 24 hours—further evidence of "up-to-dateness" on the part of a firm which has gained the well-merited confidence and loyal support of the public.

CHEMISTS TO THE NATION.

THERE is a period in every illness when the patient's vitality is at the lowest possible ebb. It is then that the trained nurse requires the perfect service that only perfect sick-room accessories can give. Apart from cases of emergency, perfection of surgical and sick-room requisites is always to be desired, and perfection is the outcome of experience. The experience of men of high scientific attainments is at your command in the comprehensive range of surgical and sick-room equipment obtainable at Boots The Chemists. Perfect provision is made to meet every requirement of the medical and nursing professions and the general public. At many of Boots principal branches special Surgical Departments have been established under the supervision of trained and certified nurses, who will be happy at all times to advise and assist customers.

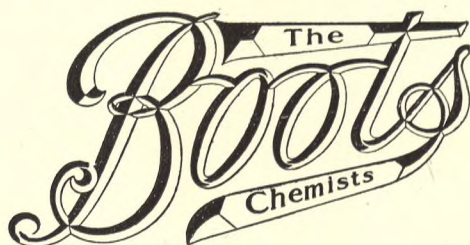

YOU ARE SAFE IN DEALING WITH BOOTS.

Travelling Requisites!

THE intrinsic quality of the best leather goods begins with the selection of flawless skins and continues through the tanning and stitching to the finished product—be it sturdy hand bag or dainty vanity case.

By their beauty of design, lasting wear and hidden strength, they give silent testimony to the care and craftsmanship that made the original selection of perfect skins.

Leather and Travelling Goods sold by Boots The Chemists are of infinite variety. But they have one thing in common—*durability*—which makes them reliable travelling companions, ready to render a lifetime's service to the happy possessor. Prices, too, are extremely moderate.

The logo for Boots The Chemists features the word "Boots" in a large, ornate, cursive script. Above the "Boots" is the word "The" in a smaller, simple font. Below "Boots" is the word "Chemists" in a similar simple font. The entire logo is set against a background of horizontal lines, suggesting a ribbon or banner.

Over 800 Branches throughout the Country.
