INVESTMENTS AND INTEREST.

To find the price at which £100 stock (bearing a definite interest) must be bought to yield a given amount of interest, multiply the price of the stock by the figures representing the interest it bears, and divide by those representing the interest desired, thus:—

Find selling price of £100 stock bearing 5% to yield 3½%.

£100 0 0

5

3½) 500 0 0

142 17 ½

To find what interest a stock (bearing definite interest) will show if bought at a certain price, multiply the nominal price of the stock by the interest it bears and divide by the price given for it, thus:—

What interest will a £100 stock bearing interest at 3% show if bought at (a) £110 (b) £90?

£100 0 0 £100 0 0

3 3

110) 300 0 0 90) 300 0 0

TABLE OF DISCOUNTS.

1½ equals 3d. in £1 or ¼th of principal

2½ " 6d. " ½th "

3½ " 9d. " ⅔th "

5% " 1/- " 20th "

7½ " 1/6 " 13th "

10% " 2/- " 10th "

The following rule will be found very simple and quick for Calculation of Percentages.

For instance, what is 3% on £65?

First, multiply the amount (65) by double the percentage (3x2=6)

65

6

— 390

Then divide the number arrived at into two parts by drawing a line between the last two figures, thus, 39/0. The figures to the left of the line are the number of shillings, and the one on the right the number of pence, so that the answer is 39/.

Where the last figure is not a cypher, it will be necessary to add to it one-fifth of its value, as shown in the following:

What is 3% on £66?

Proceed as before, viz.,

66

6

— 39/6

Then add one-fifth of the pence column to the number ... 39/6

One-fifth of 6 ... 1½

— 39/7½

CALCULATION OF INTEREST.

You lend a man £93 at 5% for 21 days

What interest are you entitled to?

5% = 1/- in the £1 (12 pence in the £1); 12 pence for 12 months equals one penny per month; three weeks equals three-fourths of a month. You are entitled to 93/- (one shilling in the £1) for a full year, or 93 pence for a month; therefore, ¾ of 93 pence will give the answer (69¾).

This method is only approximately correct, as three weeks is not exactly three-fourths of a month.

To ascertain more accurately, the amount due on a given sum for a definite number of days at a stated interest, say £75 for 73 days at 5%, first

find the amount due on the sum for 12 months by multiplying the amount by the rate of interest and dividing by 100, e.g.:—

£75 0 0

5

100) 375 0 0

3 15 0

Having found the amount due for 12 months, multiply by the number of days in question and divide by 365, e.g.:

£3 15 0

365) 273 15 0

0 15 0

Find the interest on £90 at 2½% for 7 months. 2½% equals 6d. in the £1. 3½d. equals interest for 7 months on £1, therefore 3½ x 90 = 315s. or 26/3.

ESTIMATING PROFITS.

It is generally agreed that mistakes are likely to arise unless profit is based on the "returns." It is quite a debatable point on some lines, such as selling of stocks and shares as to whether the percentage of profit should be calculated from cost or selling price, but for tradesmen there should be only one rule, and that is, all profit should be calculated on returns.

For instance, say goods are bought for £75 and sold for £100. Of this, £25 (or 25%) is profit, and could be banked, leaving the outlay or principal (£75) intact. But if one considered that a profit of 33½% had been made, and were £33 6s. 8d. banked, the principal would be reduced to £66 13s. 4d. When calculating the rate of profit, the principal must remain intact. In some trades it is the custom to calculate profit on the cost price. In many other trades it is the custom to calculate profit on the selling price, and when such a question arises it should be made very clear as to whether calculation is based "on cost," or "on returns."

The following is an easy method of calculating profits:—

½ added to the cost price will give—

50% on cost or 33½% on returns

¼rd " 33½% " 25% "

¼th " 25% " 20% "

¼th " 20% " 16½% "

¼th " 16½% " 14½% "

¼th " 14½% " 12½% "

¼th " 12½% " 11½% "

¼th " 10% " 9½% "

The above remarks apply more directly to the retailing of goods than to property, shares, etc.

RE-DIRECTION OF PARCELS.

Parcels are, when re-directed, liable to additional postage at the prepaid rate for each re-direction, except where the original and the second address are either served from the same delivery office or are within the same town delivery area, and the re-direction is made within the period of free re-direction allowed for letters. PARCELS (IMPERIAL AND FOREIGN).

Parcels are accepted for parcel post to most foreign countries under conditions similar to the inland regulations *except* that for customs requirements the contents must be declared. Before parting with a postal order, always fill in the name of the person to whom the amount is to be paid. Each order is numbered, as is also the counterfoil attached, which latter should be retained and name of payee filled in. The Postmaster-General will entertain no further claim after an order is once paid. Stamps to the amount of 5d., and not exceeding two or three in number may be affixed to make up odd sums.

POST OFFICE SAVINGS BANK.

In every town and in almost every village throughout Great Britain and Northern Ireland small savings may be paid in at the Post Office. No person can have more than one account. Amounts placed in the bank on behalf of children under seven years of age cannot be withdrawn until the child reaches that age, and then only under his or her own signature. Each depositor receives a bank book in which the amount of each deposit should be entered at the time of paying in. Any sum from a shilling upwards may be deposited. If the deposit is £20 or over, a special acknowledgment is sent from the head London office. Interest is allowed at the rate of $2\frac{1}{2}$ per cent. Any amount not exceeding £2 may be withdrawn without previous notice, on presenting the bank book. The bank book should be sent each year, postage free, on the anniversary of the date when the account was opened, to the Controller of the Savings Bank Department for purposes of checking and adding interest. The withdrawal of money up to £10 can be expedited by telegraphing, the depositor paying cost of telegrams and a service charge of one shilling.

COMMUNICATION BY WIRELESS TELEGRAPHY WITH SHIPS AT SEA.

Private radio-telegrams for transmission to or from ships of most nationalities, including British, through coast stations in the United Kingdom, are usually charged 11d. per word. There are special long-distance services with certain ocean liners through the Devizes Government station (range about 1500 m.) at a total charge of 11d. per word, through the Government high power station at Rugby (range worldwide), inclusive charge 1s. 6d. a word, and through the shortwave station at Burnham (range worldwide), inclusive charge 1s. 6d. a word.

INSURED BOX POST.

Articles of gold and silver, precious stones, jewellery, and other articles of a similar nature, which are prohibited from transmission in insured letters may now be sent in the letter mails to certain countries as "Insured Boxes." Certain articles are prohibited, such as current coin, letters or correspondence, bank notes, securities, etc. An insured box must not exceed 2-lb. in weight, and must not measure more than 12 inches in length, 4 inches in breadth, and 4 inches in depth. The boxes must be strongly made of metal or wood. The postage is 2d. for 2-oz., with minimum of 10d. The maximum limit of insurance is £400. There are special directions for packing and labelling. Customs declarations must be filled in.

CASH ON DELIVERY.

Arrangements have been made whereby senders of articles by parcel post between Great Britain and Northern Ireland and certain British possessions and other places abroad can have the value collected on delivery, and same remitted by special card money order. The "Trade Charge" *i.e.*, the amount to be collected must not exceed £40.

CASH ON DELIVERY (INLAND).

Parcels may also be posted at any Money Order Post Office for delivery at any address in Great Britain and Northern Ireland, and the value collected as above. The fees, which are additional to the ordinary parcel postage are as follows:—For trade charge not exceeding 10s., 4d.; £1, 6d.; £2, 8d.; £5, 10d.; £10, 1s., and 2d. for each additional £5 or fraction of £5 up to the maximum of £40. TELEGRAPHS.

The Postmaster-General's telegraphs are open to the public for communication to all parts of Great Britain and Ireland, to places abroad, and to ships at sea.

The charge for an "Inland" telegram is independent of distance, and depends upon the number of words only.

The Imperial and Foreign telegraph system and the Radio-telegraphic system are largely regulated by International Conventions, to which nearly all countries are parties.

Telegraph offices are usually open on week-days from 8 a.m. to 7.30 or 8 p.m., but in London and a few of the largest provincial towns, the Head Office is always open, day and night, and in many towns telegrams may be despatched at any hour from the railway station.

INLAND TELEGRAMS.

The charge is 1/- for the first twelve words including the address, and 1d. for every additional word. Telegrams handed in on Sundays, Good Friday, and Christmas Day charged 6d. extra. In Scotland 6d. extra on Sundays only.

Telegrams can be repeated on payment of half the original charge, which extra payment is refunded if error is detected. Telegrams may be posted in wall or pillar boxes, or handed to rural postmen, and are wired as soon as received at the nearest telegraph office. Late fees secure attention, in certain cases, to telegrams handed in after the usual hours. The cost of registering an abbreviated address, which must consist of two words, is £2 a year.

Telegrams in plain language in any modern European tongue or in Latin or in Esperanto are charged for according to the number of words; but all words not forming part of any modern European language, or of Latin, or of Esperanto, and all unintelligible combinations of letters are charged for at the rate of five letters to a word in the text, and as one word each when used in the address.

Exceptions—Words which are ordinarily written as one, or coupled by hyphens, as "mother-in-law," "forty-seven," "warehouseman" are counted as one word.

Such names as O'Neil, MacDonald, De la Rue, and names with the prefix "St." as St. Pancras, are charged for as single words, but double names like Bouverie-Tracy, although written with a hyphen, count as two words.

Such abbreviations as "can't," "won't," "couldn't," are counted as single words.

Figures are counted at the rate of five figures to a word. For example: "38563" counts as one word, while "385634" counts as two words.

Names such as "Newcastle-on-Tyne," "Abbey-Holme" and "Bodmin Road" are counted as one word, but "Hanging Ditch" and "Drury Lane" are each counted as two words.

When it is necessary to add the name of a county to the name of a place to distinguish it from another place of the same name, *e.g.*, Egremont (Ches.), the name of the county is not charged for.

When words are underlined, or placed in parentheses, or within inverted commas, one extra word is charged for.

One word each is also charged for the ordinary signs of punctuation if they are required to be transmitted.

When the address is beyond the limit of free delivery, portage is charged at the rate of 6d. per mile or part of a mile, the distance being calculated from the limit of free delivery.

MIXED POSTAL AND TELEGRAPH SERVICE.

A telegram can now be forwarded partly by telegraph and partly by post. For example:—"Poste Smith, 10 Broad Street, Calcutta, Marseilles." This could be telegraphed to Marseilles to catch the outgoing mail, and then forwarded on by post to its destination. For charges, enquire at any Telegraph Office.

Telegrams may also be sent to the despatching offices at Dover, Lewes, Liverpool, London (foreign section), Newcastle-on-Tyne and Southampton for onward transmission as letters in the outgoing mails.

ANALYTICAL CONTROL —THE KEYNOTE OF A GREAT ORGANISATION

ENSURING FINEST QUALITY AND GUARANTEED PURITY

IN the comparatively short space of fifty years, the firm of Boots The Chemists has developed from a small drug shop to a great organisation of 800 branches, and a huge manufacturing centre of laboratories, warehouses, works and offices occupying fifteen acres of land and employing over fifteen thousand British people. The name of "Boots The Chemists" has become a household word—a word that stands for purity and reliability.

The progress of this enterprise has been largely due to one vital factor—the principle of analytical control. The firm was one of the earliest pioneers of the wholesale drug trade in the establishment of an analytical laboratory. Since that time, research, bacteriological and pharmacological laboratories have been added. The services of these laboratories are employed by almost every department. No material is used or issued that has not first passed the careful testing and scrutiny of the Analytical Department. The Chief Analyst and his staff act as an efficient safeguard for the interests of the public. Throughout each stage of manufacture—from the raw material to the finished product—scientific research and analytical control ensure for every preparation a definite standard of strength and purity.

Several laboratories are devoted to Chemical Research. Year in and year out, patient systematic investigation continues in an endeavour to make more perfect the various processes used in the production of a whole series of Fine Chemicals, synthetic perfume bases, etc. Special laboratory facilities have recently been added for the manufacture and testing of glandular products, such as Insulin and Pituitary Gland. Boots The Chemists were among the only firms (three in number) to produce Liver Extract so valuable in the treatment of Pernicious Anaemia.

The latest machinery and the most up-to-date methods are employed in the manufacture of pills, medicinal gelatine capsules, lozenges, pastilles, etc. An important feature is the production of compressed tablets. Portability, convenience, accuracy of dosage, rapid and thorough disintegration and full therapeutic activity are the essential qualities of the compressed tablets made by Boots. Tablets, pills, etc., are untouched by hand throughout. Under perfect hygienic conditions they are counted, packed in bottles, capped and cartoned by special machinery. Some idea of the vast quantities dealt with may be gathered from the fact that in a single season some fifty million Regesan Bronchial Lozenges are manufactured and sold.

Simple drugs, such as Epsom Salts, Boric Acid, Bicarbonate of Soda, etc., are automatically weighed and packed by machinery and sold by the millions of packets all over the country.

Similar hygienic conditions prevail in the manufacture and bottling of such products as Olive Oil, Cod Liver Oil, Regelax (medicinal petroleum), etc.

The special plant for the production of Malt Extract occupies six floors and turns out, in one season, approximately one and a half million jars of Malt Extract and Cod Liver Oil.

New plant and machinery have recently been added to Boots Soap manufactory. Two particular lines—Regesan Palm and Olive Oil Soap and Kudos Soap Flakes—have during the past year achieved a tremendous and well-merited popularity.

The perfumery plant—one of the largest in the country—has a storage capacity of fifteen thousand gallons. Here, at the requisite low temperature, Eaux de Cologne, Lavender Water and other perfumes are

stored and matured before being bottled and distributed.

An important part is played by the Transport Department. Goods are expeditiously moved by a fleet of electric or petrol-driven vehicles. Raw material is collected direct from the docks, conveyed through the various manufacturing departments and warehouses and finally, as the finished article, to the branches.

The best possible working conditions are provided for the thousands of employees. A well-organised welfare department supervises working conditions and provides facilities, during leisure hours, for sport, hobbies and education.

A day and night Pharmaceutical service has been established at Piccadilly Circus, London, New Street, Birmingham, Wheeler Gate, Nottingham, Oxford Street, Manchester and Shandwick Place, Edinburgh. The normal scale of prices operates throughout the whole twenty four hours. This affords yet one more proof of the efficient service to the public provided by Boots The Chemists.

Eau de Cologne

Boots The Chemists have for years made Eaux de Cologne with all the refined and refreshing qualities of the original Farina formula. The "White Heather" and the "Jersey Castle" brands are extremely popular. They have a delightfully stimulating tonic action on the skin, and are admirable for use in the bath or as a toilet water—particularly after motoring, sport or exercise. Their pleasant, antiseptic properties make them ideal for the hospital and sickroom. Prices are extremely moderate.

Lavender Water

Many discriminating users regard Lavender Water as the daintiest and sweetest of all perfumes. The Old English Lavender Water manufactured by Boots The Chemists is unsurpassed in quality. Distilled from the famous Mitcham flowers, it has a delightful and distinctive fragrance. In addition to its charm as a perfume, its refreshing and antiseptic qualities make it ideal for use as a toilet water.

Modern methods of production and exceptional manufacturing facilities ensure full maturity and fragrance and make possible unusually moderate prices.

EFFICIENT SHOPPING SERVICE

YEARS of unique experience have enabled Boots The Chemists to organise and perfect an efficient shopping service. Every branch is planned and equipped on modern lines. Scrupulous care is given to every detail to ensure the comfort and convenience of customers. The number of departments and the variety of goods displayed save you time and trouble when shopping. In every department you will find a constant standard of good quality, moderate prices and courteous service.

Appreciation of Boots shopping service is adequately shown by the fact that in one year over one hundred million customers are served in Boots Branches, and the number is steadily increasing.
