BILLS OF EXCHANGE.

These differ from Promissory Notes in several important particulars. A Bill of Exchange is an unconditional order by a person (the drawer) upon another person (the drawee) to pay a sum of money at a certain time or on demand. To bind the drawee it must be accepted by him. Liability for payment rests first with the drawee, or, failing him, the drawer. It must be stamped according to the amount concerned. "Days of grace" are the same as for Promissory Notes.

For example—A parcel measuring 3-ft. 6-in. in its longest dimensions may measure as much as 2-ft. 6-in. round its thickest part; or a short parcel may be thicker: thus, if it measure no more than 3-ft. in length, it may measure as much as 3-ft. round its thickest part.

The postage on a parcel must be prepaid. Mark each parcel "Parcel Post." A parcel must not be posted in a letter box, but presented at the counter of a post office, and the sender should see that the weight, size and postage are in order before leaving.

RE-DIRECTION OF PARCELS.

Parcels are, when re-directed, liable to additional postage at the prepaid rate for each re-direction, except where the original and the second address are either served from the same delivery office or are within the same town delivery area, and the re-direction is made within the period of free re-direction allowed for letters. A parcel will not, however, be delivered free of charge to a person who has previously refused to accept it, and for re-direction from a Returned Letter Office a second postage is invariably charged.

PARCELS (IMPERIAL AND FOREIGN).

Parcels are accepted for parcel post to most foreign countries under conditions similar to the inland regulations except that for customs requirements the contents must be declared. The customs charges of certain countries can be prepaid by sender on depositing one-fifth to one-third of declared value, otherwise they are collected from addressee. The postage varies to different countries and must be prepaid. Insurance fee is 5d. for first £12, 2d. for each additional £12, up to 5/11 for £400.

MONEY ORDERS (INLAND).

The postal authorities cannot issue a single money order for more than £40, and will only cash them at the money order office at which they are made payable, unless they are crossed, when they can be paid through a bank. No fractional part of a 1d. can be contained in a money order.

Each order is numbered, as is also the counterfoil attached, which latter should be retained and name of payee filled in. The Postmaster-General will entertain no further claim after an order is once paid. Stamps to the amount of 5d., and not exceeding two or three in number may be affixed to make up odd sums.

POST OFFICE SAVINGS BANK.

In every town and in almost every village throughout the United Kingdom small savings may be paid in at the Post Office. A depositor may have more than one account. Amounts placed in the bank on behalf of children under seven years of age cannot be withdrawn until the child reaches that age, and then only under his or her own signature. Each depositor receives a bank book in which the amount of each deposit should be entered at the time of paying in. Any sum from a shilling upwards may be deposited. If the deposit is £50 or over, a special acknowledgment is sent from the head London office. Interest is allowed at the rate of $2\frac{1}{2}$ per cent. Any amount not exceeding £3 may be withdrawn without previous notice, on presenting the bank book. The bank book should be sent each year, postage free, on the anniversary of the date when the account was opened, to the Controller of the Savings Bank Department for purposes of checking and adding interest. The withdrawal of money up to £10 can be expedited by telegraphing, the depositor paying cost of telegrams and a service charge of one shilling.

COMMUNICATION BY WIRELESS TELEGRAPHY WITH SHIPS AT SEA.

Private radio-telegrams for transmission to or from ships of most nationalities, including British, through coast stations in the United Kingdom, are usually charged 11d. per word. There are special long-distance services with certain ocean liners through the Portishead station at a total charge of 11d. per word, and through the Government high power station at Rugby (range worldwide), inclusive charge 1s. 6d. a word.

INSURED BOX POST.

Articles of gold and silver, precious stones, jewellery, and other articles of a similar nature, which are prohibited from transmission in insured letters may now be sent in the letter mails to certain countries as "Insured Boxes." Certain articles are prohibited, such as current coin, letters or correspondence, bank notes, bearer securities, etc. An insured box must not exceed 2-lb. in weight, and must not measure more than 12 inches in length, 4 inches in breadth, and 4 inches in depth. The boxes must be strongly made of metal or wood. The postage is 2d. for 2-oz. with minimum of 10d. The maximum limit of insurance is £400. There are special directions for packing and labelling. Customs declarations must be filled in.

CASH ON DELIVERY.

Arrangements have been made whereby senders of articles by parcel post between Great Britain and Northern Ireland and certain British possessions and other places abroad can have the value collected on delivery, and same remitted by special card money order. The "Trade Charge," i.e. the amount to be collected must not exceed £40.

CASH ON DELIVERY (INLAND).

Parcels may also be posted at any Money Order Post Office for delivery at any address in Great Britain and Northern Ireland, and the value collected as above. The fees, which are additional to the ordinary parcel postage are as follows:—For Trade charge not exceeding 10s., 4d.; £1, 6d.; £2, 8d.; £5, 10d.; £10, 1s., and 2d. for each additional £5 or fraction of £5 up to the maximum of £40. C.O.D. packets may also be sent by registered letter post or by rail.

IMPERIAL AND FOREIGN CORRESPONDENCE.

To British possessions generally, Egypt, Palestine, United States of America, the British Post Office at Tangier, H.M. Ships in Foreign waters, the Shanghai Defence Force, and the North China Command, Shanghai, 1½d. for the first oz. and 1d. each succeeding oz.

To all other places including Iraq and Transjordan, 2½d. for the first oz., and 1½d. for each succeeding oz. or fraction.

SAMPLES.	2-lb. ½d. - 4-lb. 1d.

TELEGRAPHS.

The Postmaster-General's telegraphs are open to the public for communication to all parts of Great Britain and Ireland, to places abroad, and to ships at sea.

The charge for an "Inland" telegram is independent of distance, and depends upon the number of words only.

The Imperial and Foreign telegraph system and the Radio-telegraphic system are largely regulated by International Conventions, to which nearly all countries are parties.

Telegraph offices are usually open on week-days from 8 a.m. to 7.30 or 8 p.m., but in London and a few of the largest provincial towns, the Head Office is always open, day and night, and in many towns telegrams may be despatched at any hour from the railway station.

INLAND TELEGRAMS.

The charge is 1/- for the first twelve words including the address, and 1d. for every additional word. Telegrams handed in on Sundays, Good Friday, and Christmas Day charged 6d. extra. In Scotland 6d. extra on Sundays only.

Telegrams can be repeated on payment of half the original charge, which extra payment is refunded if error is detected. Telegrams may be posted in wall or pillar boxes, or handed to rural postmen, and are wired as soon as received at the nearest telegraph office. Late fees secure attention, in certain cases, to telegrams handed in after the usual hours. The cost of registering an abbreviated address, which must consist of two words, is £2 a year.

Telegrams in plain language in any modern European tongue or in Latin or in Esperanto are charged for according to the number of words; but all words not forming part of any modern European language, or of Latin, or of Esperanto, and all unintelligible combinations of letters are charged for at the rate of five letters to a word in the text, and as one word each when used in the address.

Exceptions—Words which are ordinarily written as one, or coupled by hyphens, as "mother-in-law," "forty-seven," "warehouseman," are counted as one word.

Such names as O'Neil, MacDonald, De la Rue, and names with the prefix "St." as St. Pancras, are charged for as single words, but double names like Bouverie-Tracy, although written with a hyphen, count as two words.

Such abbreviations as "can't," "won't," "couldn't," are counted as single words.

Figures are counted at the rate of five figures to a word. For example: "38563" counts as one word, while "385634" counts as two words.

Names such as "Newcastle-on-Tyne," "Abbey-Holme" and "Bodmin Road," are counted as one word, but "Hanging Ditch" and "Drury Lane" are each counted as two words.

When it is necessary to add the name of a county to the name of a place to distinguish it from another place of the same name, e.g., Egremont (Ches.), the name of the county is not charged for.

When words are underlined, or placed in parentheses, or within inverted commas, one extra word is charged for.

One word each is also charged for the ordinary signs of punctuation if they are required to be transmitted.

When the address is beyond the limit of free delivery, postage is charged at the rate of 6d. per mile or part of a mile, the distance being calculated from the limit of free delivery.

MIXED POSTAL AND TELEGRAPH SERVICE.

A telegram can now be forwarded partly by telegraph and partly by post. For example:—"Poste Smith, 10 Broad Street, Calcutta, Marseilles." This could be telegraphed to Marseilles to catch the outgoing mail, and then forwarded on by post to its destination. For charges, enquire at any Telegraph Office.

Telegrams may also be sent to the despatching offices at Dover, Lewes, Liverpool, London (foreign section), Newcastle-on-Tyne and Southampton for onward transmission as letters in the outgoing mails.

ANALYTICAL CONTROL —THE KEYNOTE OF A GREAT ORGANISATION

ENSURING FINEST QUALITY AND GUARANTEED PURITY

IN the comparatively short space of fifty years, the firm of Boots The Chemists has developed from a small drug shop to a great organisation of 900 branches and a huge manufacturing centre of laboratories, warehouses, works and offices, occupying forty acres of land and employing seventeen thousand British people. The name of "Boots The Chemists" has become a household word—a word that stands for purity and reliability.

The progress of this enterprise has been largely due to one vital factor—the principle of analytical control. The firm was one of the earliest pioneers of the wholesale drug trade in the establishment of an analytical laboratory. Since that time, research, bacteriological and pharmacological laboratories have been added. The services of these laboratories are employed by almost every department. No material is used or issued that has not first passed the careful testing and scrutiny of the Analytical Department. The Chief Analyst and his staff act as an efficient safeguard for the interests of the public. Throughout each stage of manufacture—from the raw material to the finished product—scientific research and analytical control ensure for every preparation a definite standard of strength and purity.

Several laboratories are devoted to Chemical Research. Year in and year out, patient systematic investigation continues in an endeavour to make more perfect the various processes used in the production of a whole series of Fine Chemicals, synthetic perfume bases, etc. Special laboratory facilities have recently been added for the manufacture and testing of glandular products, such as Insulin and Pituitary Gland. Boots The Chemists were among the only firms (three in number) to produce Liver Extract so valuable in the treatment of Pernicious Anæmia. The latest machinery and the most up-to-date methods are employed in the manufacture of pills, medicinal gelatine capsules, lozenges, pastilles, etc. An important feature is the production of compressed tablets. Portability, convenience, accuracy of dosage, rapid and thorough disintegration and full therapeutic activity are the essential qualities of the compressed tablets made by Boots. Tablets, pills, etc., are untouched by hand throughout. Under perfect hygienic conditions they are counted, packed in bottles, capped and cartoned by special machinery. Some idea of the vast quantities dealt with may be gathered from the fact that in a single season some fifty million Regesan Bronchial Lozenges are manufactured and sold.

Simple drugs, such as Epsom Salts, Boric Acid, Bicarbonate of Soda, etc., are automatically weighed and packed by machinery and sold by the millions of packets all over the country. Similar hygienic conditions prevail in the manufacture and bottling of such products as Olive Oil, Cod Liver Oil, Regelax (medicinal petroleum), etc.

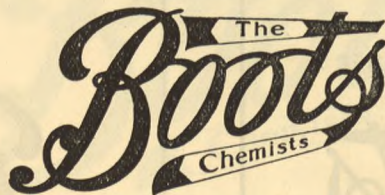

The special plant for the production of Malt Extract occupies six floors and turns out, in one season, approximately one and a half million jars of Malt Extract and Cod Liver Oil. New plant and machinery have recently been added to Boots Soap manufactory. Two particular lines—Regesan Palm and Olive Oil Soap and Kudos Soap Flakes—have during the past year maintained their well-merited popularity.

The perfumery plant—one of the largest in the country—has a storage capacity of fifteen thousand gallons. Here, at the requisite low temperature, Eau de Cologne, Lavender Water and other perfumes are stored and matured before being bottled and distributed.

An important part is played by the Transport Department. Goods are expeditiously moved by a fleet of electric or petrol-driven vehicles. Raw material is collected direct from the docks, conveyed through the various manufacturing departments and warehouses and finally, as the finished article, to the branches. The best possible working conditions are provided for the thousands of employees. A well-organised welfare department supervises working conditions and provides facilities, during leisure hours, for sport, hobbies and education.

A day and night Pharmaceutical service has been established at Piccadilly Circus, London, New Street, Birmingham, Wheeler Gate, Nottingham, Oxford Street, Manchester, Shandwick Place, Edinburgh, 9 Ranelagh Place, Liverpool, Boots Corner, Union Street and Argyle Street, Glasgow, and 100a Old Town Street, Plymouth.

The normal scale of prices operates throughout the whole twenty-four hours. This affords yet one more proof of the efficient service to the public provided by Boots The Chemists.

The logo for Boots Chemists features the word "Boots" in a large, elegant, cursive script. Above the "Boots" is the word "The" in a smaller, simple font, and below it is the word "Chemists" in a similar simple font. The entire logo is set against a background of faint, repeating "Boots Chemists" text.
