**SETTLEMENT.** Any deed whereby any definite sum, or stock, or security is settled or agreed to be settled in any manner: for every £100 or part of £100, 5s.

**INVESTMENTS AND INTEREST.**  
 To find the price at which £100 stock (bearing a definite interest) must be bought to yield a given amount of interest, multiply the price of the stock by the figures representing the interest it bears, and divide by those representing the interest desired, thus:—  
 Find selling price of £100 stock bearing 5% to yield 3½%.  
 £100 0 0  
 5  
 3½) 500 0 0 142 17 1½

To find what interest a stock (bearing definite interest) will show if bought at a certain price, multiply the nominal price of the stock by the interest it bears and divide by the price given for it, thus:—  
 What interest will a £100 stock bearing interest at 3% show if bought at (a) £110, (b) £90?  
 £100 0 0 £100 0 0  
 3 3  
 110) 300 0 0 90) 300 0 0  
 2 14 6½ 3 6 8

**TABLE OF DISCOUNTS.**  
 14% equals 3d. in £1 or 3/4th of principal  
 2½% .. 6d. .. 1/4th ..  
 3% .. 9d. .. 3/8th ..  
 5% .. 1/- .. 1/2th ..  
 7½% .. 1/6 .. 5/8th ..  
 10% .. 2/- .. 1th ..  
 The following rule will be found very simple and quick for Calculation of Percentages.  
 For instance, what is 3% on £65?  
 First, multiply the amount (65) by double the percentage (3 x 2 = 6)  
 65  
 6  
 —390  
 Then divide the number arrived at into two parts by drawing a line between the last two figures, thus, 39/0. The figures to the left of the line are the number of shillings, and the one on the right the number of pence, so that the answer is 39/-.  
 Where the last figure is not a cypher, it will be necessary to add to it one-fifth of its value, as shown in the following:  
 What is 3% on £66?  
 Proceed as before, viz.,  
 66  
 6  
 —396  
 Then add one-fifth of the pence column to the number .. 39/6  
 One-fifth of 6 .. 1½  
 —397½

**CALCULATION OF INTEREST.**  
 You lend a man £93 at 5% for 21 days. What interest are you entitled to?  
 5%—1/- in the £1 (12 pence in the £1); 12 pence for 12 months equals one penny per month; three weeks equals three-fourths of a month. You are entitled to 93/- (one shilling in the £1) for a full year, or 93 pence for a month; therefore, 3/4 of 93 pence will give the answer (69½).  
 This method is only approximately correct, as three weeks is not exactly three-fourths of a month.

To ascertain more accurately the amount due on a given sum for a definite number of days at a stated interest, say £75 for 73 days at 5%, first find the amount due on the sum for 12 months by multiplying the amount by the rate of interest and dividing by 100, e.g.:—  
 £75 0 0  
 5  
 100) £375 0 0 3 15 0

Having found the amount due for 12 months, multiply by the number of days in question and divide by 365, e.g.:—  
 £3 15 0  
 73  
 365) 273 15 0 0 15 0  
 Find the interest on £90 at 2½% for 7 months. 2½% equals 6d. in the £1, 3½d. equals interest for 7 months on £1, therefore 3½ X 90 = 315s. or 26/3.

**ESTIMATING PROFITS.**  
 It is generally agreed that mistakes are likely to arise unless profit is based on the "returns." It is quite a debatable point on some lines, such as selling of stocks and shares as to whether the percentage of profit should be calculated from cost or selling price, but for tradesmen there should be only one rule, and that is, all profit should be calculated on returns.  
 For instance, say goods are bought for £75 and sold for £100. Of this, £25 (or 25%) is profit, and could be banked, leaving the outlay or principal (£75) intact. But if one considered that a profit of 33½% had been made, and were £33 6s. 8d. banked, the principal would be reduced to £66 13s. 4d. When calculating the rate of profit, the principal must remain intact. In some trades it is the custom to calculate profit on the cost price. In many other trades it is the custom to calculate profit on the selling price, and when such a question arises it should be made very clear as to whether calculation is based "on cost," or "on returns."

The following is an easy method of calculating profits:—  
 1/2 added to the cost price will give—  
 50% on cost or 33½% on returns  
 1/3rd .. 33½% .. 25% ..  
 1/4th .. 25% .. 20% ..  
 1/5th .. 20% .. 16½% ..  
 1/6th .. 16½% .. 14½% ..  
 1/7th .. 14½% .. 12½% ..  
 1/8th .. 12½% .. 11½% ..  
 1/9th .. 11½% .. 10% ..

The above remarks apply more directly to the retailing of goods than to property, shares, etc.

TELEGRAPHS.

Telegraph offices are usually open on week-days from 8 a.m. to 7.30 or 8 p.m., but in London and a few of the largest provincial towns, the Head Office is always open, day and night, and in many towns telegrams may be despatched at any hour from the railway station.

INLAND TELEGRAMS.

The charge is 1/- (to the Irish Free State, 1/6) for the first twelve words including the address, and 1d. for every additional word. Telegrams handed in on Sundays, Good Friday, and Christmas Day charged 6d. extra. In Scotland 6d. extra on Sundays only.

Telegrams can be repeated on payment of half the original charge. If the receiver of a telegram doubts its accuracy, he may have the whole or any part of it repeated without charge, so long as the original telegram is on hand at the office of origin. Telegrams may be posted in wall or pillar boxes, or handed to rural postmen, and are wired as soon as received at the nearest telegraph office. Late fees secure attention, in certain cases, to telegrams handed in after the usual hours. The cost of registering an abbreviated address, which must consist of two words, is £2 a year.

Telegrams in plain language in any modern European tongue or in Latin or in Esperanto are charged for according to the number of words; but all words not forming part of any modern European language, or of Latin, or of Esperanto, and all unintelligible combinations of letters are charged for at the rate of five letters to a word in the text, and as one word each when used in the address.

Exceptions—Words which are ordinarily written as one, or coupled by hyphens, as “mother-in-law,” “forty-seven,” “warehouseman,” are counted as one word.

Names like MacDonald, Fitzgerald, O’Neil, De Morgan, De la Rue, St. John are counted as one word each, and any compound name which is ordinarily joined together by a hyphen or hyphens is also counted as one word, e.g., Bouverie-Tracy, Cave-Brown-Cave. Compound names not ordinarily joined by a hyphen, e.g., Lloyd George and all other combinations of names are counted according to the number of separate words or names contained in them.

Such abbreviations as “can’t,” “won’t,” “couldn’t,” are counted as single words.

Figures are counted at the rate of five figures to a word. For example: “38563” counts as one word, while “385634” counts as two words.

Names such as “Newcastle-on-Tyne,” “Abbey-Holme” and “Bodmin Road,” are counted as one word, but “Hanging Ditch” and “Drury Lane” are each counted as two words.

When it is necessary to add the name of a county to the name of a place to distinguish it from another place of the same name, e.g., Egremont (Ches.), the name of the county is not charged for.

When words are underlined, or placed in parentheses, or within inverted commas, one extra word is charged for.

One word each is also charged for the ordinary signs of punctuation if they are required to be transmitted.

When the address is beyond the limit of free delivery (three miles) portage is charged at the rate of 6d. per mile or part of a mile, the distance being calculated from the limit of free delivery.

MIXED POSTAL AND TELEGRAPH SERVICE.

A telegram can now be forwarded partly by telegraph and partly by post. For example:—“Post Smith, 10 Broad Street, Calcutta, Marseilles.” This could be telegraphed to Marseilles to catch the outgoing mail, and then forwarded on by post to its destination. For charges, enquire at any Telegraph Office.

Telegrams may also be sent to the despatching offices at Dover, Lewes, Liverpool, London (foreign section), Newcastle-on-Tyne and Southampton for onward transmission as letters in the outgoing mails.

TELEPHONE AND TELEGRAPH COMBINED DELIVERY.

Telephone subscribers’ circuits and public telephone call offices may be used for the dictation of messages to telegraphic offices for onward transmission as telegrams subject to certain conditions.

Telegrams may also be delivered to telephone subscribers by telephone, and may be addressed to subscribers’ telephonic addresses.

TELEPHONED LETTERS.

Subscribers may use telephone for sending express, air mail or ordinary letters. Rate—30 words, 3d. and 1d. for every 10 words over 30; plus postage for ordinary and air letters and usual express fee for express letters. Call fee additional.

TRUNK TELEPHONE RATES.

Between 7 a.m. and 2 p.m. for 3 minutes, the charges to subscribers and non-subscribers are: from 7½ to 10 miles, 3d.; 10-12½, 4d.; 12½-15, 5d.; 15-20, 7d.; 20-25, 9d.; increasing to 5s. 6d. for 350 miles; for each 100 miles or part over 350, 1s. The rates are lower between 2 p.m. and 7 p.m., and still lower between 7 p.m. and 7 a.m. (for 6 minutes up to 10 miles). Call office fee payable in each case. From places in Great Britain and Northern Ireland to the Irish Free State the charges are higher than the above beyond 200 miles.

AIR MAIL SERVICES.

The rate of postage (including ordinary postage) to European countries is 4d. for the first oz. and 3d. each additional oz. The Indian Air Mail leaves Saturdays; the South African, Wednesdays. Air Mail Letter Boxes are provided. See P.O. Leaflets.

NIGHT TELEGRAPH LETTER SERVICE.

Telegrams for delivery by post early the next morning may be sent between certain towns. Rate: 36 words, 1s.; and 1d. for every additional 3 words.
